

**PSID DISCLOSURE REVIEW CHECKLIST:** *Complete and provide with disclosure review request*

- 1. Disclosure review request includes only programming code and/or analysis results (i.e., no data)
- 2. Only output requiring disclosure review is included in file (i.e., no extraneous notes, etc)
- 3. Separate output files are provided for analyses based on public data (if applicable) and restricted data
- 4. Output file format is Word (.doc), Portable Document Format (.pdf), or Text File (.txt)
- 5. Review request does not exceed 50 pages
- 6. First page of analytic results includes the description of the sample or sub-sample used
- 7. First page of results for restricted analyses includes definitions and frequencies for all variables used in the analyses (e.g., tables, cross-tabulations and regressions)
- 8. Analytic results do not include:
  - A. Summary statistics (including frequency distributions), tabulations, or graphs (including scatterplots and maps) that have cell sizes under 11 observations; No minimum/maximum values for restricted data;
  - B. Listing or description of data at the individual or family level;
  - C. Listing, description, or identification by number, by name, or by descriptive information of any restricted geospatial data, including place, tract or tracts, zip code, county, etc.;
  - D. Maps, scatterplots, or graphs with any values, labels, or features (such as landmarks, road networks, original tract shape or physical features) that allow restricted geospatial data (e.g., place, tracts, zip codes, counties) to be identified or that show any geographic area below the state level, including place, tract, block group, block, ZIP code, city, or county.
